Industrial museum area Teltow

The museum was found in March 2005 and is located in Teltow.

Since 2005 the museum also offers an information centre for job and study orientation (IZB)

Our profile today:

From the steam engine to the digital world 150 years of industrial culture

Our exhibition is divided in five sections:

1. Infrastructure

From the Teltow Kanal to the energy transition.
The industrial development of the area since 1904.

2. Electronics

From tube technology over power electronics to mikroelektronik.
The base for digitisation.

3. Communication technology

From telephone to digital communication (broadband technology, optical fibre and mobile communication)

4. Automation technology

From hydraulic steel pipe regulators to digital process control technology with functional industrial facilities

5. Polymer chemistry

Research in Teltow and Potsdam with international significance for new materials and processes

6. Digital world

From 3D-printing to intelligent factory (industry 4.0). Practical setups give the possibility to get in contact with the requirements of future work

The information centre for job and study orientation

As a partner for schools and the economy with the IHK Potsdam and the company association Brandenburg/Berlin we are a competent extracurricular learning space and partner for job orientation and further education for teachers

We organise:

- + project days at the industrial museum
- + excursions in companies, institutes and universities
- + support of seminar papers and projects
- + school exhibitions
- + individual information about traineeships and studies
- + events for further teacher education
